

Demos for “[HTML5 Web Component Fundamentals](#)” by Cory House

Module 2 - Templates

1. [Defining and Cloning Templates](#)
2. [Injecting Data into Templates](#)
3. [Cloning Nested Templates](#)

Module 3 - Custom Elements

1. [Instantiating Custom Elements](#)
2. [Instantiating Extended Custom Elements](#)
3. [Lifecycle Callback Methods](#)

Module 4 – Shadow DOM Fundamentals

1. [Shadow DOM in Native HTML Elements](#)
2. [Creating Shadow DOM](#)
3. [ShadowRoot DOM Methods](#)
4. [Shadow DOM JavaScript Is Not Encapsulated](#)

Module 5 – Shadow DOM Insertion Points & Events

1. [Shadow DOM Insertion Points with <content>](#)
2. [Traversing Distributed Nodes](#)
3. [Content Selectors](#)
4. [Shadow Insertion Points with <shadow>](#)
5. [Listing Distributed Nodes and Destination Insertion Points](#)
6. [Listing Destination Insertion Points](#)
7. [Event Retargeting](#)
8. [Distributed Nodes Aren’t Retargeted](#)
9. [Some Shadow Events Stop](#)

Module 6 – Shadow DOM Styling

1. [:host](#)
2. [Theming the Shadow Host](#)
3. [:host Specificity](#)
4. [Styling :host States](#)
5. [Styling the Shadow DOM via :host-context](#)
6. [Styling Distributed Nodes via ::content](#)
7. [Style Shadow DOM from the Light DOM via ::shadow](#)
8. [Style Shadow DOM from the Light DOM via /deep/](#)
9. [Avoiding Flash of Unstyled Content with :unresolved](#)

Module 7 – Imports

1. [Simple Imports Example](#)
2. [Referencing the Owner Document](#)
3. [When is Content from Imports Applied?](#)
4. [Handling Events on Imports](#)
5. [Sub-Imports](#)
